## Contents

|   |              |   |
|---|--------------|---|
| 1 | Introduction | 1 |
| 2 | Method       | 1 |

## 1 Introduction

Say what the document covers and why it exists. Paragraphs are unindented with a blank line between them, so no manual spacing is needed.

Equations are numbered and referred to by label. Terms are annotated inside the equation rather than listed underneath,

$$y = \underbrace{ax}_{\text{signal}} + \underbrace{b}_{\text{offset}}, \quad (1)$$

so (1) explains itself.

## 2 Method

Write the body here. Subsections and subsubsections are available and are numbered to three levels.

### 2.1 A subsection

Tables use booktabs rules.

| Symbol  | Meaning     | Value |
|---------|-------------|-------|
| $\eta$  | a quantity  | 1     |
| $\beta$ | another one | 2     |

**Table 1.** A short caption.
